

- Notes:
- 1.All dimensions in millimeters.
 2. Rails are not included in outline drawing, customer can select it by themselves.The rail/frame structure under grommet need to have minimum stiffness to avoid generating low natural frequency.
 - 3.Customer have to use supporter to fix piping for vibration according drawing,and the supporter must be strong enough.
 - 4.Dimensions and thickness on drawing are key characteristics to guaranty manifolding balance,vibration,reliability according to danfoss CC validation.

"C1" means the component supplied with compressor accessories kit 5710062P06;
"C2" means the component supplied with compressor accessories kit 5710062P03;
"C3" means the component supplied with compressor assembly;
"M" means the component supplied with manifolding accessories kit 120Z0682 or 120Z0681;
"N" means Not supplied.
